

# BGRI Career Development Workshop

## News: BGRI

*The instructors really helped me in polishing my leadership and interview skills by practicing different methods which I was not aware of before. I enhanced my leadership qualities by interacting with great young scientist from around the world. I am going to use these skills in presenting my work with more confidence and with high impact.”*

-Nida Ghori, PhD Candidate,  
Kansas State University

In March 2021, **hfp consulting** delivered the Career Development for Young Scientists (CaDYS) course to twelve PhD students and postdocs through the Borlaug Global Rust Initiative.

The goals of the course were to provide: 1) a reflective approach for participants to broaden their horizons, examine and explore available career options and decide on a career path that fits their interests and motivations; 2) practical tools to communicate their skills, goals and interests in an impactful way; and 3) skills and strategies to master the job application process.

Participants also had the opportunity to recognize the value of shared experiences offered by their diverse, international peer network through Borlaug and the importance of strengthening and deepening their individual networks to support their next career move.
